

The public is invited to attend the November meeting of the Cambridge Entomological Club

Noah Charney and Charles Eiseman

Insect Signs

Most of the signs insects leave are either overlooked or, when they are observed, seem difficult to decipher. Noah Charney and Charles Eiseman spent two years researching signs left by insects and how to read their tracks. The knowledge they gained is presented in their new book "Tracks and Sign of Insects and Other Invertebrates." The authors will join us for a presentation about insect signs and share interesting stories about their adventures gathering material for their unique book. Copies of the book will be available for purchase, and signing, after the talk.

Tuesday November 9th, 2010 at 7:30 PM

Harvard University • 26 Oxford Street • MCZ 101

A PARKING PERMIT is strongly recommended. See <https://www2.uos.harvard.edu/cgi-bin/permit/purchase.pl>

THE CAMBRIDGE ENTOMOLOGICAL CLUB meets on the second Tuesday of the month from October through May.
